

Adobe Sign integrations for government.

Add e-signatures to every application and system your teams use every day.

Across government agencies, the ability to quickly gather and verify signatures is both fundamental to success and one of the biggest challenges to getting things done. From citizen services to human resources, to procurement, and beyond, agency departments continuously struggle to improve efficiency and flexibility while complying with strict government privacy, legal, and security requirements.

Adobe Sign allows government agencies to incorporate [electronic signatures](#) (e-signatures) into their enterprise systems, customize business workflows, and digitize paper-based processes by department. Whether creating a custom application with embedded e-signature capability or integrating e-signatures into existing enterprise systems, 40% of agreements signed with Adobe Sign rely on our flexible APIs.

By incorporating [e-signatures](#) from Adobe Sign into everyday business processes, agency departments are increasing productivity, reducing costs, and better serving their citizens by delivering exceptional experiences anywhere, anytime, and on any device.

Easily integrate Adobe Sign into leading business applications.

By leveraging the Adobe Sign flexible APIs and turnkey integrations, government organizations can prepare and send documents for e-signature directly from existing systems and applications. Turnkey integrations are put in place in minutes, so there's nothing new for personnel or constituents to learn or for IT to code. Adobe Sign partners with leading companies to help speed e-signature processes within the systems and applications your organization already uses including:

Adobe Experience Manager

Adobe Sign includes:

- Legal, trusted e-signatures
- Support for certificate-based digital signatures
- Web and mobile apps
- Prebuilt integrations and APIs

“By integrating Adobe Sign into Microsoft SharePoint workflows, we’re making life a lot easier for our employees while improving oversight and efficiencies at the same time.”

DARRYL LAJOLA

IT service delivery specialist, Office of Enterprise Technology Services, State of Hawaii

Anyone who accesses external applications can receive status updates in real time for transactions initiated using Adobe Sign, e-sign documents from anywhere using a web browser or mobile device, or retrieve stored copies of the signed agreements. The [Adobe Sign Developer Center](#) provides instructions on how to leverage our APIs to create or enhance custom applications such as:

CITIZEN SERVICES

- Licensing and permits
- Benefits enrollment
- Grant applications
- Housing programs

PROCUREMENT

- Vendor selection processes
- RFPs and contracts
- Approvals/authorizations
- Supplier agreements
- Change-order tracking
- Project completions

HUMAN RESOURCES

- Applications
- Onboarding forms
- Badging/equipment
- Requisitions
- Approvals/authorizations
- Compliance activities

LEGAL

- NDAs
- Legal templates
- Contracts
- Countersignatures
- Web forms

Adobe Sign is Microsoft's preferred e-signature solution.

By integrating Adobe Sign into your agency processes, every department can:

- **Extend existing workflows with e-signatures**—Use our flexible APIs to incorporate e-signatures into existing enterprise systems and easily add e-signatures using turnkey integrations for leading business applications.
- **Simplify and speed signature workflows**—Use intuitive visual design tools to create easy-to-follow custom processes or deploy standalone, self-serve web applications for signature-based processes.
- **Embed signable forms into a web page**—Post documents or forms on a website so that citizens, suppliers, or personnel can sign agreements easily.
- **Brand the signing experience**—Easily add your agency or department logo, tagline, and key messages.
- **Verify signer identities**—Choose from a variety of authentication methods, ranging from simple passwords to driver's license or passport image validation.
- **Include both vendor and employee signatures**—Combine e-signatures with new or existing employee signature methods, including [digital signatures](#) that work with pre-issued IDs like PIV or CAC cards.

Use e-signatures to accelerate government business.

Since the passage of the U.S. Electronic Signatures in Global and National Commerce (ESIGN) Act in 2000, e-signatures have been considered legal and enforceable everywhere in the United States. The [ESIGN Act](#) provides government agencies of all sizes with the means to accelerate productivity, reduce costs, and ensure compliance by utilizing e-signatures to digitize cumbersome paper-based workflows. Using legal, trusted e-signatures from Adobe Sign helps organizations easily track, audit, manage, and complete workflow cycles. With Adobe Sign, signing and approval processes are reduced from days to minutes, efficiency and mobility improve, and security and compliance are ensured for your most critical data.

“The response to the use of Adobe Sign for the Staff Development reimbursement has been overwhelmingly positive.”

DEBORAH LINDLEY
IT project lead, Digital Transaction Services,
Sonoma County, California

By integrating Adobe Sign into processes each department uses every day, your agency can:

- **Prepare documents for signature**—Quickly turn paper, Microsoft Office documents, or static PDF forms into fillable, signable forms with the help of artificial intelligence, powered by Adobe Sensei.
- **Request signatures from others**—Send to one or more recipients, in any order. With a few quick clicks, they can review and e-sign—anytime, anywhere, on any device.
- **Track and manage**—Track document status in real time. Get notified when people sign. Send reminders and maintain an audit trail automatically.
- **Send a single document to many people**—Each recipient receives a personalized version to sign, expediting workflows.
- **Work from your favorite applications and devices**—Work conveniently from web or mobile, or from other applications such as Adobe Acrobat DC, Microsoft Word, and Microsoft PowerPoint.
- **Reduce paper waste**—Virtually eliminate costs associated with using paper-based documents.

Work with the digital document leader.

From the global leader in secure digital document solutions for more than 20 years, Adobe Sign is trusted by federal, state, and local agencies across the United States and is used by more than 50% of Fortune 100 companies in the private sector. Backed by hundreds of security features, processes, and controls, Adobe Sign is certified compliant with rigorous security standards, including SOC 2 Type 2, ISO 27001, FedRAMP, and PCI DSS.
