

Adobe Sign and Salesforce.

Accelerate business transactions with e-signatures you trust.

Speed up sales cycles and reduce frustrating delays in the contract approval process by adding trusted e-signatures from Adobe Sign to Salesforce. Adobe Sign is Lightning Ready and integrates into the Salesforce apps your teams use every day, including Sales Cloud, Service Cloud, Community Cloud, Salesforce CPQ, and more. So you can send, track, and sign contracts—anywhere, on any device—without leaving Salesforce.

Accelerate to revenue.

With Adobe Sign and Salesforce, your reps can build contracts and send them for signature in a fraction of the time, which gives them more time to sell. And they can monitor approval status directly within Salesforce, so they always know where every deal stands. Adobe Sign customers have seen their turnaround times drop by up to 95% and their number of completed contracts rise. And Adobe Sign integrates with leading Contract Lifecycle Management (CLM) and Configure-Price-Quote (CPQ) solutions, including Salesforce CPQ, to accelerate the entire quote-to-close process.

Adobe Sign enables organizations to get to success faster.

Get to revenue faster and improve win rates

Reduce legal risk and improve compliance

Show measurable benefits from CRM investment

Improve customer experience across all touchpoints

Gain visibility of contract status

Close deals anywhere on any device

Improve sales productivity and efficiency

Remove paper workflows through digital transformation

Adobe Sign for Salesforce makes it easy for customers to achieve amazing results:

“Implementing Adobe Sign and Salesforce helped us streamline processes—creating a uniform brand, eliminating errors and unnecessary delays from a manual process, and delivering an intuitive customer experience while enhancing security.”

ADAM FOYSTON
Former Salesforce CRM manager, Exterion Media

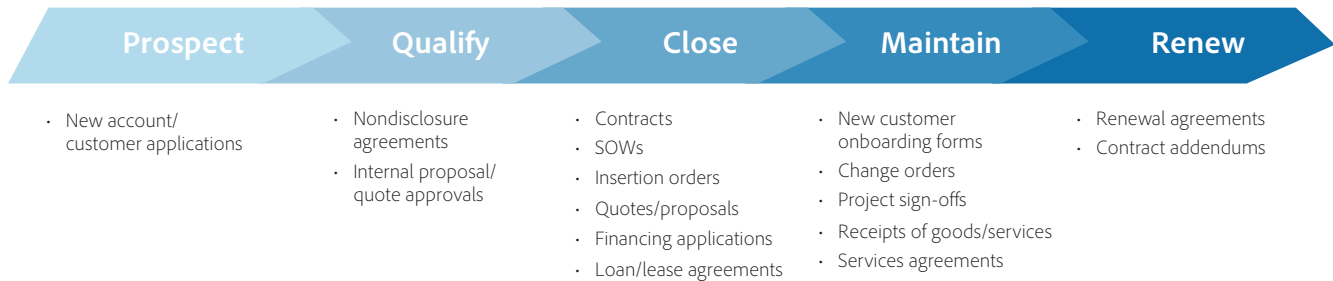

“We didn’t expect such a rapid rollout and adoption rate. The implementation was an immediate success, and it exposed the easy-to-use solution across the organization, leading to new ideas to further streamline other contracting processes.”

CONNIE BRENTON
Director of legal operations, NetApp

“We were looking to invest in proven technologies and strong support brought to us by a credible partner. That’s what Adobe brings us.”

JONATHAN BACK
CFO and operations director, Diners Club UK

Use Cases: Adobe Sign can be used across the entire sales lifecycle, from prospecting to renewal.

Improve signing experiences.

By integrating Adobe Sign with Salesforce, you take the hassle out of signing documents. Administrators can easily create custom agreement templates in Salesforce that let reps populate customer information and then send it for signature. Recipients can just as easily sign from any device in a few clicks, without downloading or installing any software. And once they sign, the Salesforce record is updated, and the final version is automatically archived and sent to all parties.

Minimize risk. Improve compliance.

Reduce your exposure to legal and business risk with an automated process that removes the potential for human error. Create workflows that follow specified business rules to help ensure the right information and the right documents are used every time. Improve compliance by maintaining a complete audit trail for every transaction. And take advantage of a variety of authentication methods to verify signer identity including secure government ID verification.

“Using Adobe Sign with Salesforce, we eliminate redundancies and errors for better and faster service. The finance team no longer needs to worry about delaying contracts due to discrepancies.”

GEHAN MODHANAYAKE
Head of IT, DMG Events

Increase productivity.

Use the Adobe Sign visual designer to streamline multiple-signer workflows, optimize signature fields, and preprogram recipient routing rules based on contact role/job title and optional signers. Automatically populate data from Salesforce into documents that you send for signature, and push data captured from those documents seamlessly back into Salesforce, without rekeying information. Once a transaction is complete, you can trigger status updates by email or within Salesforce Chatter. Or automatically initiate downstream activities such as invoicing, order fulfillment, customer onboarding, and payment collection. Adobe Sign even has a Salesforce component that shows you the status of contracts in your email feed, so you can track and manage Salesforce contracts right from Gmail and Microsoft Outlook. You can also add Adobe Sign web forms to Community Cloud portals, enabling your clients to quickly access and sign agreements right from the portal page. Customer data from the forms can be mapped back into Salesforce.

About Adobe Sign.

From the trusted leader and innovator in secure digital document technology for over 20 years, Adobe Sign is used by organizations of all sizes to accelerate revenue, mitigate risk, and increase customer retention. Adobe Sign works seamlessly with Salesforce Sales Cloud, Service Cloud, Community Cloud, Salesforce CPQ, and more. For more information or to start a free 30-day trial, go to www.adobe.com/go/sign-salesforce, visit the Salesforce AppExchange, or call 855-914-2747 in the United States or 44 800 912 9931 in the United Kingdom.
