

# Adobe Sign for Workplace by Facebook

Adobe Sign integration with Workplace by Facebook makes it easier for customers and partners to quickly and securely send documents for electronic signature, and track the signature status without ever leaving the Workplace application. The new integration helps users drive more efficient business processes and receive Workplace notifications as agreements move through the signature cycle.

## Finish business faster with Adobe Sign for Workplace.

### Save time and speed signing.

Send sales contracts, candidate offer letters, onboarding paperwork, and procurement contracts for e-signature and track their status quickly and easily, right from within Workplace. Simply upload documents from the Adobe Sign Library or your device and send them directly from Workplace Chat. Signing is easy with in-app notifications. A final version of the signed agreement is sent to both parties and is automatically stored in the Adobe Sign Library.

### Track agreement status with Workplace notifications.

Get real-time visibility into the status of your contracts. Send to single or multiple signers sequentially, and monitor the progress of all Adobe Sign documents through real-time notifications from the Adobe Sign bot in Workplace Chat. Check Status provides visibility into which agreements or contracts are out for signature and where they are in the approval cycle.

### Delight partners, customers, and co-workers.

Real-time notifications let users know when agreements are ready for their signature. Recipients can sign documents, contracts, and forms in just a few clicks from any device without

creating an account. The whole process takes just a few minutes from start to finish.

### Reduce legal risk and improve compliance.

Mitigate risk and maintain compliance with a complete audit trail for every transaction. [Adobe Sign](#) solutions meet or exceed the broadest range global security standards and legal requirements—from Adobe, the world's trusted leader in secure digital documents.

## A complete e-signature solution for Workplace by Facebook.

With six billion transactions a year, Adobe Sign is a trusted leader and innovator in secure digital document solutions and standards-based [electronic signatures](#). That's why organizations of all sizes rely on Adobe Sign to transform paper-based processes into 100% digital workflows to accelerate their business. The Adobe Sign integration with Workplace offers partners and customers the easiest signing experience and the ability to manage and track the entire e-signature process right from within the Workplace app.
